high quality polystyrene plastic

CORE BOXES

The Dia-Team Core Box is moulded in impact safe polystyrene H22F plastic, colour light grey.

The Dia-Team Core Box will maintain its properties from arctic to tropical temperatures and give a good protection to the core during transportation and storing.

The Dia-Team Core Box has 1030 mm long channels with channel marking every 100 mm and drainage holes.

The design of the Dia-Team Core Box provides stable stacking and reduced volume when transported empty.

The Dia-Team Core Box is easy to mark using any type of pen.

The Dia-Team Core Box uses a simple locking lid system. Lid can be removed and replaced with ease.
